

Flyt

Raise,
lower, tilt,
turn and
rotate
with ease.

Introducing an interactive touchscreen monitor arm that moves with unparalleled flexibility.

Touchscreens have transformed the way we use computers. The Flyt touchscreen monitor arm has been designed to move fluidly and effortlessly with you, improving your comfort, posture and efficiency.

With its interactive design, you can extend the arm and adjust your monitor to virtually any angle. This flexibility makes Flyt the ideal solution for performing a wide range of tasks.

Key features:

- Supports ergonomic posture
- Wide range of movement
- Easy to adjust
- Strong and stable, with options to support monitor weights between 0.9kg and 13.6kg

Key benefits:

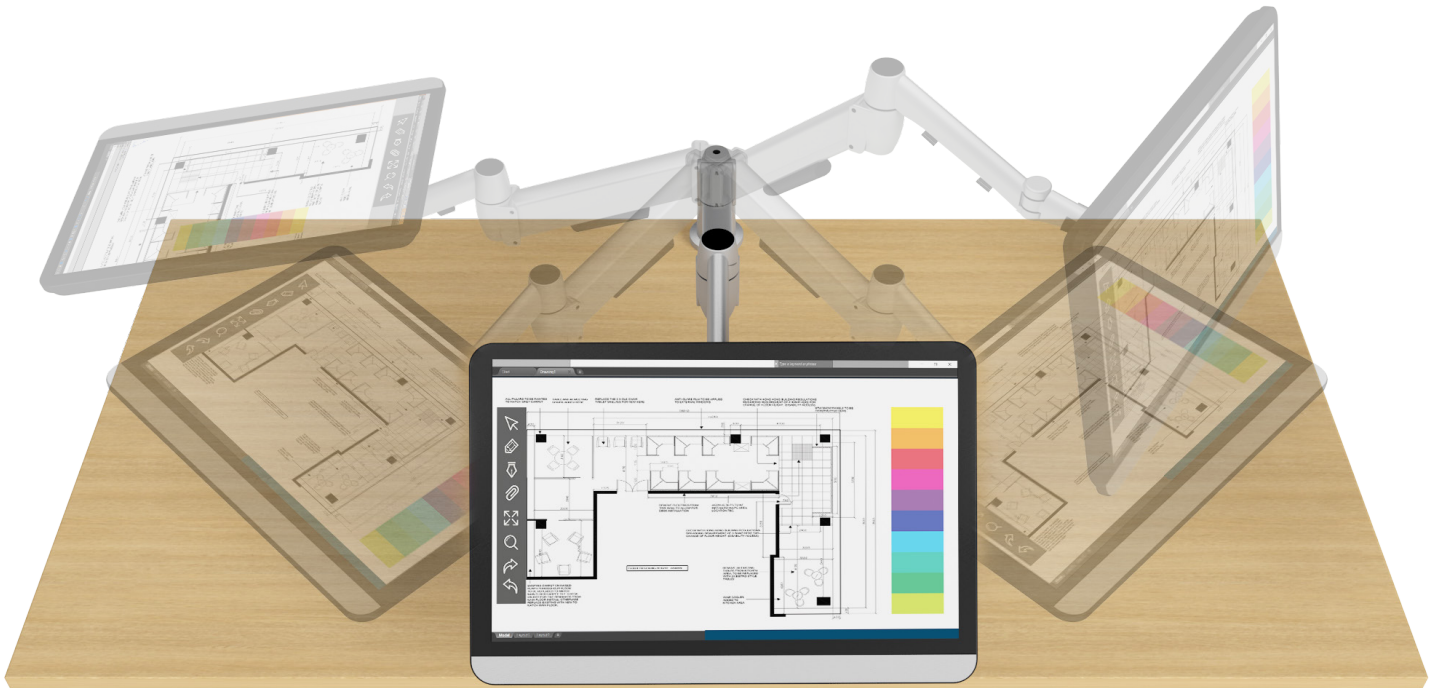

- Improves efficiency
- Enhances comfort
- Scalable design allows it to be upgraded easily and cost-effectively
- Flexibility to perform a wide range of tasks
- Environmentally friendly – reduces the need for paper

People often start a job with one monitor and later need to add more. By choosing a double hub with a single monitor arm, you can add another arm in future, without changing the base.

What makes Flyt unique?

- Gas spring offers greater precision and smoother movement
- Easy to upgrade from a single arm to a double arm
- Integrates with Adapt's SpaceArm monitor arm system

Precision:

- A narrow band of adjustment allows you to position your monitor with greater accuracy. Monitor weight options include: 0.9-4.5kg, 2.26-7.25kg and 6.8-13.6kg.

Time saving:

- Adapt can pre-set the counterbalance weight to your monitor type for added convenience.

Parallelogram with gas spring:

- Flyt's parallelogram mechanism allows you to smoothly adjust (and maintain) the height of your monitor, without changing the angle.
- Gas springs are reliable and accurate for counterbalancing monitor weight.
- Gas springs allow a faster, more stable and seamless movement than mechanical springs.
- A wide range of clamps are available, allowing numerous design and mounting options.

Environmental design

At Adapt we carefully consider environmental factors in every stage of our product cycle. This includes selecting environmentally friendly materials during design, manufacturing, packaging and shipping.

Adapt aftercare

Research shows that to achieve the full benefits from ergonomic products, employees should be trained to use them properly. As part of our service, training is available to ensure you make the most of your furniture and accessories.

Superior products

Every Adapt product is made from the highest quality materials and goes through rigorous testing before it becomes available on the market. That's why all Adapt manufactured products come with a lifetime guarantee, giving you peace of mind.
