

Sustainability statement – Adapt Global Group

At Adapt Global Group, we strive to follow sustainable practices in the design, manufacture and distribution of our products and solutions. This helps our customers minimise their impact on the wider environment, reduces costs and contributes to their long-term prosperity. Many of our solutions support environmental accreditations such as LEED.

Sustainable designs

Our products are designed with the potential to be reused, repurposed and recycled. The flexible design of the vast majority of our products allows them to be upgraded and reconfigured, without needing to change the whole product. This extends their shelf life and helps to reduce waste.

Environmentally friendly

Products are assembled at local distribution centres, helping to reduce carbon footprint. They are manufactured using recycled materials wherever possible and delivered to customers in recyclable packaging.

Lifetime guarantee

As part of our commitment to offering sustainable solutions, we offer a Lifetime Guarantee on many of our products. This means that if there is ever a fault found with the quality of the product, we will repair or replace the product free of charge. This helps you achieve maximum benefit from your solutions.

Product continuity

We guarantee to maintain continuity of product supply for Adapt Ergonomics products. This means that you will be able to source the same products or component parts from us at any time in the future, maximising the value of your products.
